Attorney Docket No. 83438

2

A WINGLET FOR THE TRAILING END OF TOWED FLEXIBLE UNDERWATER LINES

ABSTRACT OF THE DISCLOSURE 5

A winglet for mounting on a trailing end of a flexible line 7 to be towed by an underwater vehicle includes an internal collar member for connection to an inside surface of the line at the 8 trailing end thereof, an outer collar member for connection to an 9 outside surface of the line outboard of the internal collar, and 10 11 connection means for fixing the internal and outer collar members 12 to the line trailing end. A plurality of fins are mounted on an 13

14 from the outer collar member.
